Springville, NY 14141

1/4/10:

RJR Engineering is pleased to announce the addition of Rick Meigs, P.E. to our staff. Rick comes to us with 30 years of experience in nuclear materials processing, in both operations and design. Rick has experience in nuclear fuel production, spent nuclear fuel reprocessing, high level waste vitrification, nuclear facility decommissioning, and radiological protection. He has lead several large design efforts for processing nuclear waste for US and foreign customers.

RJR Engineering's primary focus is in the civil, structural and mechanical engineering disciplines, and we serve all client types: private, manufacturing/industrial, municipal & governmental. We do have several relationships in place that span from large, multinational companies to small and emerging businesses to help us meet the demands of project requirements, and client needs.

We operate under an ASME NQA-1 Quality Assurance Program.
